Education

*Pune Vidyarthi College of Engineering
B.Tech in IT – 8.26 CGPA*

[2025-2029]

Skills

Languages: C++, JavaScript, Python, Full Stack

Backend: Fast APIs

AI/ML: RAG, LLM Systems

Tools: Git, Github

PROJECTS

DriveLegal : AI Road Safety Chatbot for India | [Github](#) | [Demo Video](#)

- Built an offline RAG chatbot answering Indian traffic law queries with exact challan amounts and cited

law sections, using local Mistral 7B via Ollama (zero API cost, no hallucinated fines)

- Designed RAG pipeline with FAISS + LangChain, chunking legal PDFs and retrieving via all-MiniLM-

L6-v2 embeddings to eliminate LLM hallucination

- Implemented offline reverse geocoder for GPS-based, city-level legal answers

- Developed FastAPI backend and Streamlit frontend for end-to-end query handling

MediSense AI | [Github](#) | [Live Demo](#) | [Demo Video](#)

- Developed MediSense AI, an AI-powered health-tech web application that analyses pathology lab reports (PDFs) using Google Gemini 3 Flash.

- Built an automated pipeline to extract, process, and interpret key biomarkers from medical reports for accurate health analysis.

- Implemented a health scoring system to provide an overall assessment based on extracted clinical parameters.

- Generated personalised lifestyle and wellness recommendations using AI-driven analysis of laboratory results.

- Improved accessibility of medical information by transforming technical pathology reports into actionable, easy-to-understand health insights.

- Tech Stack: Google Gemini 3 Flash, AI/LLMs, PDF Processing, Data Extraction, Health Analytics, Web Technologies.

EXTRA-CURRICULAR ACTIVITIES

Work as a collab Team Lead in a student led NGO & a sector-8 company (Forengers Foundation) focused on sustainable development

ACHIEVEMENTS

- *Top 21 Finalist at the IIT Madras Road Safety AI Hackathon, selected from 19,000+ submissions nationwide.*
- *Winner (1st Place) at the National Ignition Hackathon for developing an innovative technology solution.*
- *Finalist in 4 National-Level Hackathons, demonstrating consistent performance in competitive software development and innovation challenges.*
- *Selected Contributor for GirlScript Summer of Code (GSSoC) 2026, contributing to open-source software projects.*
